Education

Hunter College, City University of New York (CUNY)

May 2025

Bachelor of Arts in Computer Science

Relevant courses: Data structures, Algorithms, Deep learning, Operating Systems, Computer Security

Experience

Educator & MAPSCorps Co-Coordinator

Sep 2025 - PRESENT

Mount Sinai Hospital

New York, NY

- Leveraged digital health platforms and data dashboards to monitor community health metrics and evaluate public health outreach initiatives.
- Analyzed program data to identify trends and generate actionable insights supporting population health improvement.
- Coordinated community-based research activities while supervising and mentoring MAPSCorps interns.
- Developed an automated Google Apps Script workflow for staff scheduling and timesheet management, reducing manual administrative workload.
- Collaborated with multidisciplinary healthcare teams to improve operational workflows and data accuracy.
- Supported data collection, quality assurance, and reporting for community health initiatives.

MAPSCorps Summer Intern

MAY 2025 – August 2025

Mount Sinai Hospital

New York, NY

- Collected and verified community health resource data to support population health initiatives.
- Conducted field-based data collection and quality assurance using digital data collection tools.
- Collaborated with healthcare professionals and fellow interns to improve the accuracy of community resource datasets.

CTP Data Science Fellow

July 2024 – May 2025

CUNY Tech Prep

New York, NY

- Developed an AI-powered accessibility application using multimodal computer vision to assist visually impaired users.
- Applied Python, SQL, Pandas, NumPy, and Scikit-learn for healthcare-related data analysis and predictive modeling.
- Built machine learning workflows for extracting meaningful insights from structured datasets.
- Collaborated in Agile teams to design data-driven software solutions.

PROJECTS

BLIND SPOT (Python • Gemini AI • Computer Vision) | [Blind-spot](#) |

FEB 2025 - May 2025

- Developed an AI-powered assistive application that provides real-time scene descriptions for visually impaired individuals.
- Integrated computer vision, speech synthesis, and obstacle detection to improve accessibility and user safety.
- Demonstrates the application of artificial intelligence in digital health and assistive technologies.

LABEL IQ (Node.js • PostgreSQL • REST API) | [Label-IQ](#) |

FEB 2025 - May 2025

- Designed scalable backend architecture supporting secure healthcare-style data workflows.
- Developed RESTful APIs and optimized PostgreSQL database performance.
- Focused on reliable data exchange, authentication, and system scalability.

Budget Buddy (Python • Machine Learning) | [Budget Buddy](#) |

MARCH 2025 - May 2025

- Improved prediction model accuracy from 50% to 80% through feature engineering and model optimization.
- Developed a conversational AI interface for financial data analysis.

Technical Skills

- Programming: Python, SQL, Java, C++, C, PHP
- Data & Analytics: REDCap, Pandas, Scikit-learn, Data Visualization, Dashboarding, Pivot Tables, ETL
- Tools & Platforms: Tableau, Jupyter Notebook, AWS, Docker, Git, HuggingFace, REDCap, EXCEL
